A safety reminder to carry ladders, irrigation pipes and other equipment parallel to the ground at all times! If the equipment comes in contact with an overhead power line, the electrical current can cause a serious or even fatal injury.

Remember these words: **LOOK UP AND LIVE!**
Chelan-Douglas Community Action Council partners with Douglas PUD to deliver energy efficiency services. Depending on your qualifications, they offer no-cost or low-cost home energy audits. Weatherization reduces energy costs for families by improving the efficiency of their homes.

Weatherization technicians use energy audits to determine which energy efficiency measures are most appropriate and cost-effective to reduce home energy consumption in hot and cold climates.

Typical measures include installing insulation, reducing air infiltration, performing tune-ups and repairs to heating and cooling systems, replacing appliances to improve efficiency and safety, and replacing incandescent lighting with compact fluorescent bulbs. These energy efficiency improvements have resulted in average energy savings of 20% per household.

For more information about the Weatherization Assistance Program, please call Chelan-Douglas Community Action Council (CDCAC) at 509 662-6156, visit their website at cdcac.org.
