7 Recording

Recordings
Creating recordings and pausing live TV both require a DVR (Digital Video Recorder). There are several ways to record besides those covered in 6 Guide - Alerts & Recording. They are listed here.

Quick Recording
The fastest and easiest way to begin recording is to use the RECORD key on your remote control.

Step 1: Start Recording
While watching a program, press RECORD. Recording will begin immediately.

You can also start a quick record on the on-screen Guide.

Highlight a program you want to record using the Arrow Keys and press RECORD.

If the program is currently on, recording will begin immediately. The program will be recorded until it is scheduled to finish. To manually stop the recording before it is finished, press STOP. If the program comes on in the future, your system will record the program for you automatically.

General Guidelines About Recordings
Your TV can even be turned off and recording will take place.

You can record two programs and watch a different program simultaneously.

Check with your service provider to see additional multiple recording options.

Pausing Live TV (PLT)
Recording capability also allows you to pause live TV (PLT). While watching a channel, PLT will temporarily store what you have watched so you can pause a program and then press play to resume watching.
Controlling Live TV

While watching a recorded program or live TV, you can use the Playback Control Keys to control playback.

Press PAUSE on your remote control to pause the program. Programs can be paused as long as the current channel is not changed.

The far right box indicates the current time.

DVR Playback Controller

Any time you press one of the Playback Control Keys while watching a previously recorded program, the DVR playback controller is displayed.

The box to the left indicates the playback function in use.

The bar in the middle gives a visual representation of where you are in the recording. The lighter section indicates how much of the recording has been played.
Schedule Event

With Schedule Event, you can select the channel, date, start and stop time, duration, and frequency of a recording. It is helpful when you want to record or watch a portion of a program on a reoccurring basis.

Accessing the Schedule Event Screen

Option 2:
Press MENU on your remote control, navigate to DVR, then scroll down to Schedule Event, and press OK.

Configuring the Schedule Event Screen

The information (the date, program name, channel, time and frequency of recording) is listed on the Scheduled Event screen.

Movie Ratings

MPAA (Motion Picture Association of America) Ratings System

**G – General Audience**
This is a film which contains nothing which would, in the view of the MPAA Rating Board, be offensive to parents whose younger children view the film.

**PG – Parental Guidance Suggested**
The theme of a PG-rated film may itself call for parental guidance. There may be some profanity in these films. There may be some violence or brief nudity. But these elements are not deemed so intense as to require that parents be strongly cautioned beyond the suggestion of parental guidance. There is no drug use content in a PG-rated film.

**PG-13 – Parents Strongly Cautioned**
A PG-13 film is one which, in the view of the MPAA Rating Board, leaps beyond the boundaries of the PG rating in theme, violence, nudity, sensuality, language, or other contents, but does not quite fit within the restricted R category. Any drug use content will initially require at least a PG-13 rating.

**R – Restricted**
An R-rated film may include hard language, or tough violence, or nudity within sensual scenes, or drug abuse or other elements, or a combination of some of the above, so that parents are counseled to take this advisory rating very seriously.

**NC-17 – No Children 17 or Under**
NC-17 does not necessarily mean “obscene or pornographic” in the often accepted or legal meaning of those words. The MPAA Review Board does not and cannot mark films with those words. These are legal terms and for courts to decide. The reasons for the application of an NC-17 rating can be violence or sex or aberrational behavior or drug abuse or any other elements which, when present, most parents would consider too strong and therefore off-limits for viewing by their children.
