### ACTION ITEM SUMMARY

- Greg Mackey will provide Bob Rogers with Douglas PUD's suggested edits to the revised draft Twisp River Steelhead Live Spawning Plan memo (titled, "Incubation and early rearing of juvenile Twisp summer steelhead at Methow Hatchery from incomplete viral sampled adult female summer steelhead").
- Bob Rogers will remove references about Winthrop National Fish Hatchery (NFH) from the background section of the revised draft Twisp River Steelhead Live Spawning Plan memo, and will instead convey that Methow Hatchery can accommodate the program.

- Bob Rogers will have Washington Department of Fish and Wildlife (WDFW) Fish Health staff contact Keely Murdoch regarding the type of sonicator that is needed for processing samples for virus testing of live-spawned Twisp River steelhead at the Methow Hatchery.
- Keely Murdoch and Bob Rogers will contact Lynn Hatcher, once Hatcher becomes available after the government shut-down, to bring him up to speed on the details of the proposed actions for live-spawning Twisp River steelhead at the Methow Hatchery for the YN's Steelhead Kelt Reconditioning Program.

- Bob Rogers will revise the draft Twisp River Steelhead Live Spawning Plan memo, as discussed at the October 7, 2013 conference call, and will provide the updated revised memo to Mike Schiewe and Kristi Geris for distribution to the Hatchery Committees.
