Subject: HCP-HCs and PRCC HSC: 1/6 action items
Date: Thursday, January 6, 2022 4:43:00 PM

Hi HCP-HCs and PRCC HSC: Here are the action items from today's extra meeting, focused on updating the Recalculation Data Summary in preparation for approval of the associated SOA in the January 19 meeting.

- Catherine Willard will send the slides shown in today's meeting comparing allocation of hatchery production that resulted from the 2013 recalculation effort versus what they would be based on spawner distribution
- Todd Pearsons will prepare a similar comparison of hatchery production allocation for PRD mitigation fish.
- The PUDs will update the Recalculation Data Summary (V11) to include the following revisions:
 - For SAR datasets with an odd number of years, change of the SAR values to an average based on PIT and CWT average to better alternate between PIT and CWT datasets, for the hatchery programs and years discussed in today's meeting
 - Tom Kahler will prepare average Steelhead SAR per project adjusted for average harvest.
 - Tables 8 and 9 will be eliminated from the Data Summary document
 - Catherine Willard will update Table 7 based on new RID survival rates

Thank you
Larissa
