

SECONDARY SERVICE

PRIMARY LINE  
EXTENSION

### SECONDARY SERVICE or LINE EXTENSION?

Mr. & Mrs. Douglas have purchased a 5 acre parcel. The closest power line is across the county road. If they choose to build within 150' of the power line, (new home location 1) they will need a **SECONDARY SERVICE**. If they choose to build at the center of the lot (new home location 2 - more than 150' from existing power lines) a **PRIMARY LINE EXTENSION** will be required. A new transformer will need to be installed near their home site.

### ALTERED SERVICE

John has purchased a house that is old and has a meter base but no meter. If the service has been disconnected for more than 12 months, a Labor & Industries Electrical Inspector will have to inspect the service. The inspector may determine that the service must be upgraded or **ALTERED** to meet current standards.
